	BANNER DEFINITIONS						
*	"**Limit**": Maximum number of times the course can be repeated						
	by a student. Valid values are NULL and 1 to 98, allowing up to						
	99 occurrences.						
	The repeat limit is used in the repeat check process in Academic History.						
	The value entered in this field does not prevent a student from taking a						
	course as many times as desired. If an attempt is made to register a student						
	in a course after exceeding the repeat limit, the system delivers a						
	warning/error message, if repeat limit severity is being checked for the						
	registration term according to the Term Control Form (SOATERM).						
	These warnings/errors can be overridden. However, this field does						
	designate how many times the course will be counted in the Repeat Rules						
	Process (SHRRPTS) for credit.						
**	"**Maximum Hours**": Maximum number of hours a student can earn in						
	multiple enrollments in the course. Valid values for this field are null						
	and 0.000 to 9998.999.						
	The value entered in this field does not prevent a student from taking a						
	course as many times as desired. If an attempt is made to register a student						
	in a course after exceeding the maximum hours, the system delivers a						
	warning/error message, if repeat limit severity is being checked for the						
	registration term according to SOATERM.						
	These warnings/errors can be overridden. However, this field does						
	designate how many times the course will be counted in the SHRRPTS						
	Process.
