Learn about what is happening in our community and what can be done to improve it. Join us for a viewing of the film and share in the discussion with director Georg Koszulinski, Immokalee farm workers featured in the film, and representative of Coalition of Immokalee Workers.

Reviews of the Film:

"an intimately observed documentary focused on today's migrant farmworker, a misunderstood, maligned, necessary yet frequently forgotten group living in the shadows of America's massive food production machinery."

"Georg Koszulinski's at times invisible camera follows a family of undocumented workers as they work hard, raise their children, and are systematically exploited with poor conditions, menial wages, and the threat of prosecution constantly hanging over them. "
