**Institutional repositories—the time is now!** *Tina Neville, USF St Petersburg.* Librarians at USF St. Petersburg recently established an institutional repository to collect and preserve the documents and scholarly output of our institution. By preserving our organizational productivity (reports, committee minutes, images, theses, articles, etc) in one secure location, the entire campus community has quick and easy access to a wide variety of information by and about our campus. The presentation will offer tips on creating a repository of this type, consider content choices, and discuss how the repository can play a significant role in institutional planning, communication, and accreditation efforts.
