Notes, Cautions, and Warnings

NOTE: A NOTE indicates important information that helps you make better use of your computer.

CAUTION: A CAUTION indicates potential damage to hardware or loss of data if instructions are not followed.

↑ WARNING: A WARNING indicates a potential for property damage, personal injury, or death.

Working on Your Computer

- Turning Off Your Computer
- After Working Inside Your Computer

Before Working Inside Your Computer

Use the following safety guidelines to help protect your computer from potential damage and to help to ensure your personal safety. Unless otherwise noted, each procedure included in this document assumes that the following conditions exist:

- You have performed the steps in Working on Your Computer.
- You have read the safety information that shipped with your computer.
- A component can be replaced or--if purchased separately--installed by performing the removal procedure in reverse order.

WARNING: Before working inside your computer, read the safety information that shipped with your computer. For additional safety best practices information, see the Regulatory Compliance Homepage at www.dell.com/regulatory_compliance.

CAUTION: Many repairs may only be done by a certified service technician. You should only perform troubleshooting and simple repairs as authorized in your product documentation, or as directed by the online or telephone service and support team. Damage due to servicing that is not authorized by Dell is not covered by your warranty. Read and follow the safety instructions that came with the product.

CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface, such as a connector on the back of the computer.

△ CAUTION: Handle components and cards with care. Do not touch the components or contacts on a card. Hold a card by its edges or by its metal mounting bracket. Hold a component such as a processor by its edges, not by its pins.

CAUTION: When you disconnect a cable, pull on its connector or on its pull-tab, not on the cable itself. Some cables have connectors with locking tabs; if you are disconnecting this type of cable, press in on the locking tabs before you disconnect the cable. As you pull connectors apart, keep them evenly aligned to avoid bending any connector pins. Also, before you connect a cable, ensure that both connectors are correctly oriented and aligned.

NOTE: The color of your computer and certain components may appear differently than shown in this document.

To avoid damaging your computer, perform the following steps before you begin working inside the computer.

- 1. Ensure that your work surface is flat and clean to prevent the computer cover from being scratched.
- 2. Turn off your computer (see Turning Off Your Computer).
- 3. If the computer is connected to a docking device (docked) such as the optional Media Base or Battery Slice, undock it.

CAUTION: To disconnect a network cable, first unplug the cable from your computer and then unplug the cable from the network device.

- 4. Disconnect all network cables from the computer.
- 5. Disconnect your computer and all attached devices from their electrical outlets.
- 6. Close the display and turn the computer upside-down on a flat work surface.

NOTE: To avoid damaging the system board, you must remove the main battery before you service the computer.

- 7. Remove the main battery (see <u>Battery</u>).
- 8. Turn the computer top-side up.
- 9. Open the display.
- 10. Press the power button to ground the system board.

CAUTION: To quard against electrical shock, always unplug your computer from the electrical outlet before opening the display.

CAUTION: Before touching anything inside your computer, ground yourself by touching an unpainted metal surface, such as the metal at the back of the computer. While you work, periodically touch an unpainted metal surface to dissipate static electricity, which could harm internal components.

11. Remove any installed ExpressCards or Smart Cards from the appropriate slots.

Turning Off Your Computer

CAUTION: To avoid losing data, save and close all open files and exit all open programs before you turn off your computer.

- 1. Shut down the operating system:
 - o In Windows Vista :

Click **Start**, then click the arrow in the lower-right corner of the **Start** menu as shown below, and then click **Shut Down**.

o In Windows XP:

Click **Start** \rightarrow **Turn Off Computer** \rightarrow **Turn Off** . The computer turns off after the operating system shutdown process is complete.

2. Ensure that the computer and all attached devices are turned off. If your computer and attached devices did not automatically turn off when you shut down your operating system, press and hold the power button for about 4 seconds to turn them off.

- Removing the Battery
- Installing the Battery

Dell Latitude 5420/E5420/E5420m Owner's Manual Removing the Battery

- 1. Follow the procedures in <u>Before Working On Your Computer</u>.
- 2. Slide the release latches to unlock the battery.

3. Remove the battery from the computer.

Related tasks Installing the Battery

Installing the Battery

- 1. Slide the battery back into the computer. The release latches automatically click into the lock position.
- 2. Follow the procedures in After Working Inside Your Computer.

Removing the Battery

After Working Inside Your Computer

After you complete any replacement procedure, ensure you connect any external devices, cards, and cables before turning on your computer.

CAUTION: To avoid damage to the computer, use only the battery designed for this particular Dell computer. Do not use batteries designed for other Dell computers.

- 1. Connect any external devices, such as a port replicator, battery slice, or media base, and replace any cards, such as an ExpressCard.
- 2. Connect any telephone or network cables to your computer.

CAUTION: To connect a network cable, first plug the cable into the network device and then plug it into the computer.

- 3. Replace the battery.
- 4. Connect your computer and all attached devices to their electrical outlets.
- 5. Turn on your computer.

Recommended Tools

The procedures in this document may require the following tools:

- Small flat-blade screwdriver
- #0 Phillips screwdriver
- #1 Phillips screwdriver
- Small plastic scribe
- Flash BIOS update program CD

System Setup

- Overview
- Entering System Setup
- System Setup Options

Overview

System Setup allows you to:

- change the system configuration information after you add, change, or remove any hardware in your computer.
- set or change a user-selectable option such as the user password.
- read the current amount of memory or set the type of hard drive installed.

CAUTION: Unless you are an expert computer user, do not change the settings for this program. Certain changes can cause your computer to work incorrectly.

Entering System Setup

- 1. Turn on (or restart) your computer.
- 2. When the blue DELL logo is displayed, you must watch for the F2 prompt to appear.
- 3. Once the F2 prompt appears, press <F2> immediately.

NOTE: The F2 prompt indicates that the keyboard has initialized. This prompt can appear very quickly, so you must watch for it to display, and then press <F2> . If you press <F2> before you are prompted, this keystroke will be lost.

4. If you wait too long and the operating system logo appears, continue to wait until you see the Microsoft Windows desktop. Then, shut down your computer and try again.

System Setup Options

NOTE: Depending on the computer and its installed devices, the items listed in this section may or may not appear.

| General | | |
|------------------------|--|--|
| System Information | This section lists the primary hardware features of your computer. | |
| | SystemInformation | |
| | Memory Information | |
| | Processor Information | |
| | Device Information | |
| Battery Information | Displays the battery status and the type of AC adapter connected to the computer | |

| Boot Sequence | Allows you to change the order in which the computer attempts to find an operating system. Diskette Drive Internal HDD USB Storage Device CD/DVD/CD-RW Drive Onboard NIC Cardbus NIC | |
|---------------------|---|--|
| Boot List Option | Allows you to change the boot list option. • Legacy • UEFI | |
| Date/Time | Allows you to change the date and time. | |
| Syste | em Configuration | |
| Integrated NIC | Allows you to configure the integrated network controller. The options are: • Disabled • Enabled • Enabled w/PXE • Enabled w/ ImageServer | |
| | Default Setting: Enabled w/PXE | |

System Management

Allows you to control the systems management mechanism. The options are:

- Disabled
- Alert Only
- ASF 2.0
- DASH/ASF 2.0

Default Setting: Disabled

Serial Port

Identifies and defines the serial port settings. You can set the serial port to:

- Disabled
- Auto
- COM1
- COM2
- COM3
- COM4

NOTE: The operating system may allocate resources even though the setting is disabled.

| Parallel Port | Allows you to configure the parallel port on the docking station. The options are: |
|-------------------|---|
| | DisabledATPS2ECPDMA1DMA3 |
| | Default Setting: AT |
| Serial Port | Allows you to configure the integrated serial port. The options are: Disabled COM1 COM2 COM3 COM4 Default Setting: COM1 |
| SATA Operation | Allows you to configure the internal SATA hard-drive controller. The options are: • Disabled • ATA • AHCI Default Setting: AHCI |

| | NOTE: SATA is configured to support RAID mode. |
|--------------------|---|
| USB Controller | Allows you to control the USB controller. The options are: |
| | Enable USB Controller |
| | Diasabe USB Mass Storage Dev |
| | Disable USB Controller |
| | Default Setting: Enable USB Controller |
| SMART Reporting | Allows you to activate the Self Monitoring Analysis and Reporting Technology (SMART). |
| | Default Setting: Disabled |
| Diskette Drive | Allows you to activate the diskette drives. The options are: |
| | Disabled |
| | Enabled |
| | Default Setting: Disabled |

| Miscellaneous Devices | Allows you to enable or disable the following devices: |
|--------------------------|--|
| | Internal Modem Fixed Bay eSATA Ports Hard Drive Free Fall Protection External USB Port Microphone Camera |
| | You can also enable or disable Media Card and 1394 together. Default Setting: All devices are enabled. |
| Keyboard illumination | Allows you to configure the keyboard illumination feature. The options are: |
| | Disabled Level is 25% Level is 50% Level is 50% Levels is 100% Default Setting: |
| | Level is 75% |

Drives Allows you to configure the SATA drives on board. The options are:

- SATA-0
- SATA-1
- SATA-4
- SATA-5

Default Setting: All drives are enabled.

LCD Brightness Allows you to set the display brightness depending up on the power source (On Battery and On AC).

NOTE: The Video setting will only be visible when a video card is installed into the system.

| Security | | |
|-------------------|---|--|
| Admin Password | Allows you to set, change, or delete the administrator (admin) password. NOTE: You must set the admin password before you set the system or hard drive password. | |

MOTE:

Successful password changes take effect immediately.

M NOTE:

Deleting the admin password automatically deletes the system password and the hard drive password.

NOTE:

Successful password changes take effect immediately.

Default Setting: Not set

System Password

Allows you to set, change or delete the system password.

Successful password changes take effect immediately.

Default Setting: Not set

| Internal HDD-0 Password | Allows you to set or change the system's internal hard-disk drive. |
|-------------------------------|--|
| | NOTE: Successful password changes take effect immediately. |
| | Default Setting: Not set |
| Password Bypass | Allows you to enable or disable the permission to bypass the System and the Internal HDD password, when they are set. The options are: • Disabled • Reboot bypass |
| | Default Setting: Disabled |
| Password Change | Allows you to enable the disable permission to the System and Hard Drive passwords when the admin password is set. |
| | Default Setting: Allow Non-Admin Password Changes is not selected |

| Strong Password | Allows you to enforce the option to always set strong passwords. Default Setting: Enable Stron Password is not |
|----------------------------|--|
| OROM Keyboard Access | selected. Allows you to set an option to enter the Option ROM Configuration screens using hotkeys during boot. The options are: |
| | EnableOne Time EnableDisable |
| | Default Setting: Enable |
| TPM Security | Allows you to enable the Trusted Platform Module (TPM) during POST. Default Setting: The option is disabled. |

Computrace Allows you to activate or disable the optional Computrace software The options are: Deactivate Disable Activate **NOTE**: The Activate and Disable options will permanently activate or disable the feature and no further changes will be allowed Default Setting: Deactivate CPU XD Allows you to enable the Execute Support Disable mode of the processor. Default Setting: **Enable CPU XD** Support Non-Admin Allows you to determine whether Setup Changes changes to the setup options are allowed when an Administrator Password is set. If

disabled the setup options are locked by the admin password.

| Password | Allows you to |
|---------------|------------------|
| Configuration | determine the |
| | minimum and |
| | maximum length |
| | of Administrator |
| | and System |
| | passwords. |

Admin Setup Lockout

Allows you to prevent users from entering Setup when an Administrator password is set.

Default Setting: **Enable Admin Setup Lockout** is not selected.

Performance

Multi Core Support

This field specifies whether the process will have one or all cores enabled. The performance of some applications will improve with the additional cores. This option is enabled by default.Allows you to enable or disable multicore support for the processor. The options are:

- All
- '
- 2

Default

| | Setting: All |
|----------------------|---|
| Intel® SpeedStep™ | Allows you to enable or disable the Intel SpeedStep feature. |
| | Default Setting: Enable Intel SpeedStep |
| C States Control | Allows you to enable or disable the additional processor sleep states. |
| | Default Setting: The options C states, C3, C6, Enhanced C-states, and C7 options are enabled. |
| Limit CPUID | Allows you to limit the maximum value the processor Standard CPUID Function will support. |
| | Default Setting: Enable CPUID |

| Intel® TurboBoost™ | Allows you to enable or disable the Intel TurboBoost mode of the processor. Default Setting: Enable Intel TurboBoost |
|-----------------------------|---|
| Hyper- Thread Control | Allows you to enable or disable the HyperThreading in the processor. Default Setting: Enabled |

| Power Management | |
|------------------|---|
| AC Behavior | Allows you to enable or disable the computer from turning on automatically when an AC adapter is connected. |
| | Default Setting: Wake on AC is not selected. |

Auto On Time

Allows you to set the time at which the computer must turn on automatically. The options are:

- Disabled
- Every Day
- Weekdays

Default Setting: Disabled

USB Wake Support

Allows you to enable USB devices to wake the system from Standby.

NOTE: This feature is only functional when the AC power adapter is connected. If the AC power adapter is removed during Standby, the system setup will remove power from all of the USB ports to conserve battery power.

Wireless Radio Control

Allows you to enable or disable the feature that automatically switches from wired or wireless networks without depending on the physical connection.

Default Setting: Disabled

| Wake on LAN | Allows you to enable or disable the feature that powers on the computer from the Off state when triggered by a LAN signal. Default Setting: Disabled |
|---------------------|--|
| ExpressCharge | Allows you to enable or disable the ExpressCharge feature. The options are: • Standard • ExpressCharge |
| | Default Setting: Standard |
| Charger Behavior | Allows you to enable or disable the battery charger. The options are; • Disabled • Enabled Default Setting: Enabled |
| DOST B | ehavior |
| PUSIB | CIIAVIUI |

| Adapter Warnings | Allows you to enable or disable the system setup (BIOS) warning messages when you use certain power adapters. Default Setting: Enable Adapter Warnings |
|---------------------|--|
| Mouse/ Touchpad | Allows you to define how the system handles mouse and touch pad input. The options are: • Serial Mouse • PS2 Mouse • Toushpad/PS-2 Mouse Default Setting: Touchpad/Mouse 2 |
| Numlock Enable | Allows you to enable the Numlock option when the computer boots. Default Setting: Enable Network |

| USB Emulation | Allows you to enable or disable the Legacy USB Emulation. |
|---------------------|---|
| | Default Setting: Enable Legacy USB Emulation is selected. |
| Fn Key Emulation | Allows you to set the option where the <scroll lock=""> key is used to simulate the <fn> key feature.</fn></scroll> |
| | Default Setting: Enable Fn Key Emulation |
| POST HotKeys | Allows you enable the sign-on screen message display indicating the keystroke sequence to access the System Setup option menu. |
| | Default Setting: Enable F12 Boot Option Menu |
| Fastboot | Allows to set the option to speed up the boot process. The options are: |
| | Minimal |
| | Thorough |
| | • Auto |
| | Default Setting: Thorough |

Virtualization Support

Virtualization

Allows you to enable or disable the Intel Virtualization Technology.

Default Setting: Enable Intel Virtualization Technology

Wireless

Wireless Switch

Allows to set the wireless devices that can be controlled by the wireless switch. The options are:

- WWAN
- WLAB
- Bluetooth

Default Setting: All the options are selected.

Wireless Device Enable

Allows you to enable or disable the wireless devices.

Maintenance

Service Tag

Displays the Service Tag of your computer.

| Asset Tag | Allows you to create a system asset tag if an asset tag is not already set. This option is not set by default. |
|--------------------|--|
| SERR Messages | Controls the SERR message mechanism. This option is not set by default. Some graphics cards require that the SERR message mechanism be disabled. |
| System Logs | |
| BIOS Events | Allows you to view and clear the System Setup (BIOS) POST events. |
| DellDiag Events | Allows you to view and clear the DellDiag events. |
| Thermal Events | Allows you to view and clear the Thermal events. |

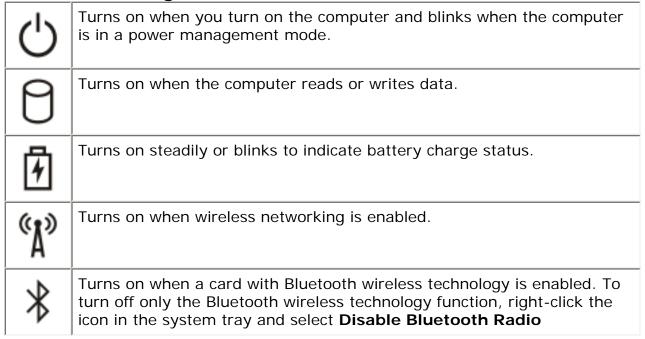

| Power Events | Allows you to view and clear the Power events. |
|----------------------------|---|
| BIOS Progress Events | Allows you to view and clear the BIOS Progress Events. |

Diagnostics

• **Diagnostics**

Diagnostics

Device Status Lights

If the computer is connected to an electrical outlet, the battery light operates as follows:

| Alternately blinking amber light and blue light | An unauthenticated or unsupported non-Dell AC adapter is attached to your laptop. |
|---|---|
| Alternately blinking amber light with steady blue light | Temporary battery failure with AC adapter present. |
| Constantly blinking amber light | Fatal battery failure with AC adapter present. |
| Light off | Battery in full charge mode with AC adapter present. |
| Solid white light on | Battery in charge mode with AC adapter present. |

The lights located above the keyboard indicate the following:

| Ø | Turns on when the numeric keypad is enabled. |
|---|--|
| A | Turns on when the Caps Lock function is enabled. |
| ➊ | Turns on when the Scroll Lock function is enabled. |

Contacting Dell

• Contacting Dell

Contacting Dell

NOTE: If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog.

Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area. To contact Dell for sales, technical support, or customer service issues:

- 1. Visit support.dell.com.
- 2. Select your support category.
- 3. If you are not a U.S. customer, select your country code at the bottom of the page, or select All to see more choices.
- 4. Select the appropriate service or support link based on your need.
