Transforming
Research into Results

Primal Pictures Anatomy and Physiology Online

- Put learning into perspective by rotating 3D models and adding or removing layers of anatomy
- Provide students hands-on online resources that complement in-class teaching methods
- Based on Human Anatomy and Physiology Society (HAPS) learning objectives
- Developed in consultation with expert anatomy and physiology educators

Bring life to the classroom with 3D anatomy resources from Ovid

Anatomy and Physiology Online (APO), a product developed by Primal Pictures, is designed to enhance anatomy and physiology curriculums.

With 20 body system modules – complete with clear 3D images, comprehensive text, clinical and case studies, learning objectives and quizzes – APO provides all of the online, supplemental material needed to support a 2-semester anatomy and physiology course.

Best of all, APO was designed to support learning objectives. Teaching tools enliven the classroom while supporting different learning styles. Guided-learning resources give students study material that continue their education outside of the classroom.

And because APO is now accessible on OvidSP, the leading information search, discovery, and management solution, you can offer all of your key information on one, easy-to-access platform.

Why Anatomy and Physiology Online?

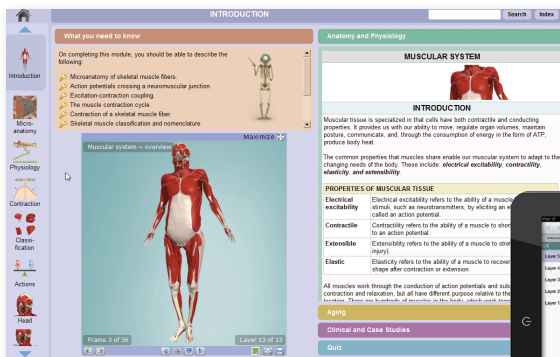

- Access to anatomy and physiology teaching material and classroom support
- Ideal for students and teachers that want to access it on the go - via their iPad®
- Integrated lab activities ensures key concepts can be mastered when lab space is at a premium
- 20 body system modules – complete with clear 3D images and models
- Multimedia approach to learning - vodcasts, narrated animations and illustrations, pronunciation guides, dissection slides, and more
- 250+ clinical topics and case studies covering pathophysiology
- Comprehensive clinical information on causes (etiology), symptoms, diagnosis and treatment options.
