Healthcare professionals and institutions strive to provide the highest quality care to their patients based on the latest evidence from research, clinician expertise, and patient preference.

Based in Australia, the Joanna Briggs Institute (JBI)—one of the world's leading evidence-based practice organizations—has developed an evidence-based practice model that is considered a benchmark in the healthcare industry.

Using the model, healthcare professionals assess the world's best primary literature, applying a strict methodology to evaluate for relevancy, accuracy, and scientific credibility; synthesize and transfer the evidence; then use it to provide the best possible patient care.

This unique book series, published by Lippincott Williams & Wilkins and available only on OvidSP, enables clinicians, managers, and other healthcare professionals to:

- Understand the JBI model of evidence-based healthcare

- Evaluate qualitative and quantitative research

- Appraise evidence from intervention and diagnostic accuracy studies

- Learn ways to minimize risks from adverse events
