ACTION ITEM 3	Change of Course, HUN 1201
PRESENTER	Gabriel Gados
NOTES	
<p>The School of Pure and Applied Sciences proposes a change in course prerequisite(s) and minimum grade(s) for HUN 1201 Human Nutrition from <i>BSC 1010 and BSC 1010L, "C" or higher to Senate Bill 1720 Testing Exemption or successful completion of all Developmental courses.</i></p> <p>The change is being made in response to health professions needing to reduce the amount of credits in their programs. Many schools do not have a prerequisite for Nutrition.</p>	
ACCEPTED	EFFECTIVE TERM
	Fall 2016
COMMITTEE MEMBER COMMENTS	
<p>Dr. Collins supports the change and believes that her students will still do well.</p> <p>Don asked if the prerequisite removal will need to be covered by another class. Dr. Collins responded that another course would not need to take place of the BSC 1010/L</p> <p>The original request came from Health and future proposals by Pure and Applied Sciences will be addressing the same prerequisite issue in other classes and in future curriculum meetings.</p> <p>It was mentioned that Nutrition is not a science general education course because it does not have a laboratory.</p>

ACTION ITEM 4	New Course, MAT 0058
PRESENTER	Sabine Eggleston
NOTES	

The School of Pure and Applied Sciences proposes a new course, MAT 0058 Mathematics for College Success – Completion Modules. The course prerequisite would be MAT 0057 with a grade of “M” and is designed to allow students, who have shown mastery of at least half of the topics in MAT 0057, to complete the remaining topics in the course without repeating the entire course of MAT 0057. Students need to show mastery of fundamental arithmetic and algebraic concepts necessary for MAT 1033 or MAT 1100. Successful completion of this course requires that students successfully complete all proscribed modules and achieve a grade of “C” (70%) or greater in the overall course.

The course is being created for those students who are still struggling to complete developmental mathematics. Modules 3 and 4 will be covered in the MAT 0058 and this will reduce the amount of credits students will need to take to complete developmental mathematics.

ACCEPTED WITH MINOR CORRECTIONS	EFFECTIVE TERM
Corrections to prerequisites for MAT 1033 and MAT 1100 are included with this action item.	Exception, Spring 2016

COMMITTEE MEMBER COMMENTS

Do many students have an issue with not completing MAT 0058? Yes

How many developmental credits are needed before students can enter college credits? Dr. Wright mentioned that many students can skip the developmental math and that the amount of credits varies.

Will MAT 0058 be two semesters? No, only one semester.

Some students can retake the PERT and skip any more developmental classes.
