Re: February 3, 2017, Curriculum Committee Meeting

Dr. Stewart:

By request of the presenter, action item seven on the agenda, a proposal for changes to the Cardiopulmonary Sciences, B.S. program, was removed from the agenda. The request from the presenter was to postpone this proposal until after the exploratory meetings concerning the General Education programs for the baccalaureate degrees is complete.

Also, it was my understanding based on a response from your office, that the proposals concerning the A.A., General Education focus for Physical Therapist Assistant and Opticianry would be handled internally since it was not technically a curricular matter, at least from a faculty standpoint.

Don Ransford, Curriculum Committee Chair
