<p>Provide justification (below) for each change on this proposed curriculum action.</p>
<p>This course was approved as a new course during the November 2019 Curriculum Committee meeting. Following the meeting, it was noted that there are some differences across School of Education upper-division (3000-4000) courses with respect to the prerequisite language. The proposed prerequisite change adds language that is in alignment with prerequisite language in our other B.S., Elementary Education, upper-division courses.</p>

Change to course description (provide below)

This course covers the principles, strategies, and methods associated with effective learning environments that encourage positive social interaction and communication among members of the learning community. The course emphasizes teacher attitudes, language, values, and behaviors that influence student behaviors and learning. Teacher candidates will explore the relationship between and among social, emotional, and academic learning. The course also includes methods and strategies that support school safety, character development, and effective communication with school professionals and parents. Teacher candidates will also study the Code of Ethics and Principles of Professional Conduct of the Education Profession in Florida, as well as legislation that informs professional and ethical decision making. Classroom management strategies and interventions appropriate for English Language Learners (ELL) and students with exceptionalities will also be addressed. Teacher candidates will complete 15 hours of foundation-level field experience during this course.

Section IV, Justification for proposal

<p>Provide justification (below) for each change on this proposed curriculum action.</p>
<p>The School of Education is proposing a revision to the course description and topic outline for EDG 3410, Classroom Management and Communication, based on two circumstances:</p> <ol style="list-style-type: none"> 1. A recent update (September 2019) to the Florida Department of Education’s Uniform Core Curriculum Map for teacher preparation requires teacher preparation programs to identify which program-level courses address and assess specific curricula areas. Our B.S., Elementary Education, program must address “character-based classroom management” as part of this recent update, so our course description and topic outline for EDG 3410 have been revised to meet this expectation. 2. As presented at the November 2019 Curriculum Committee meeting, the School of Education is eliminating two courses in the B.S., Elementary Education, program: <ul style="list-style-type: none"> EDE 4220 Integrated Health and Recreation (2 credits) EDF 4782 Ethics and Law (2 credits). <p>Specific content from these two courses will now be addressed in EDG 3410, Classroom Management and Communication. School safety and social and emotional learning (SEL), previously addressed in EDE 4220, will now be included in EDG 3410. The Code of Ethics and Principles of Professional Conduct of the Education Profession in Florida, as well as the Florida Consent Decree, were both previously addressed in EDF 4782 and in EDG 3410; these documents will now become more prominently featured in EDG 3410.</p>

Section III, Justification for proposal

Teacher certification in the state of Florida includes a series of licensure exams, known as the Florida Teacher Certification Exams. Students in the B.S., Elementary Education, must pass all licensure exams as a requirement for graduation. The Elementary Education, K-6 Exam includes four subtests covering content and content pedagogy in the areas of language arts and reading; social science; science; and mathematics. The content assessed in each subtest is comprehensive, addressing standards associated with kindergarten through sixth grade. Our current curricular framework in the B.S., Elementary Education program includes courses that integrate two content areas into a single course, often making it difficult to support breadth and depth in the teaching of each critical content area and relevant pedagogy. This proposed program change includes the creation of four new courses, each representing a single content area. Elementary Education programs at other state colleges (Chipola College, Daytona State College, Polk State College, St. Petersburg College, and Northwest Florida State College) include two and as many as four courses dedicated to a single content area to support teacher certification licensure requirements.

Provide justification (below) for each change on this proposed curriculum action.
1. Deletion of EDE 4220 Integrated Health and Recreation (2 credits): Key concepts and relevant learning outcomes will be integrated into other existing courses. For example, school safety will be addressed in EDG 3410 Classroom Management and Communication.

2. Deletion of EDF 4782 Ethics and Law (2 credits): Key concepts and relevant learning outcomes will be integrated into other existing courses. For example, EDG 3410 Classroom Management and Communication currently includes a required assignment associated with the Principles of Professional Conduct for the Education Profession in Florida. Two other courses, TSL 4080 Second Language Acquisition and Culture and EEX 3012 Educational Needs of Students with Exceptionalities, introduce students to the Florida Consent Decree and the Individuals with Disabilities Education Act.
3. Deletion of EDE 4226c Integrated Language Arts, Social Studies, and Literature with Practicum (4 credits) and EDE 4304c Integrated Math and Science with Practicum (4 credits): The addition of four new courses allows for each of the four content areas to be addressed within a single course, rather than as a combination of two content areas embedded into a single course as represented in the current courses.

Elementary Education, BS

[Return to ~~\(\\$returnto_text\)~~ Return to: Programs of Study](#)

The Bachelor of Science (BS) in Elementary Education is designed to prepare individuals to teach all subject areas grades K-6. The program provides an educational pathway for students who have earned an Associate in Arts degree to include EDF 2005. It is also a good option for students with a child development focus. Upon graduation, students will meet the mandated state teaching requirements for certification in Elementary Education with ESOL and Reading Endorsements. Students are strongly encouraged to complete EDF 2085 and EME 2040 as both courses remain Elementary Education program graduation requirements.

Program Highlights:

The BS in Elementary Education is a Florida Department of Education (FLDOE) approved program that culminates with both Reading and ESOL endorsements. The program includes courses in teaching students with English as a second language, students with exceptionalities, reading competency, classroom management, assessment, and integrated approaches to teaching methodologies at the elementary school level. Students will learn to facilitate lessons that integrate math and science, health, music and movement, as well as literature, fine arts, language arts, and social sciences. Field Experience requirements are progressive in nature, building upon previous semester experiences. Students will observe teachers in the field, teach lessons through the practicum courses, and complete a full-time teaching internship in their final semester. Courses are offered for full-time and part-time students, with blended and online courses where applicable.

Admission Requirements:

In addition to fulfilling the entrance requirements for Florida SouthWestern State College, applicants for the BS in Elementary Education degree program must meet the following requirements consistent with Florida Statute 1004.04:

Completion of the Associate in Arts (AA) degree or the equivalent, including all general education and required Florida mandated common course prerequisites. Students with a minimum of 60 transferable hours, with all general education requirements and prerequisites met, may apply for admission.

Completion of EDF 2085 Introduction to Diversity for Educators - (I) with a grade of "C" or better.

Applicants must have an overall grade point average of at least 2.5 on a 4.0 scale or have completed the requirements for a baccalaureate degree with a minimum grade point average of 2.5 on a 4.0 scale from any college or university accredited by a regional accrediting association, as defined by State Board of Education rule, with a minimum of 60 credit hours.

Demonstrated mastery of general knowledge, including the ability to read, write, and compute, by passing the General Knowledge Test of the Florida Teacher Certification Examination.

Applicants not meeting stated admissions criteria may petition for program admittance if they feel that there are mitigating circumstances. Applicants must submit an official petition form to the School of Education (forms are available online at <http://www.fsw.edu/soe/forms>).

Requirements to Enroll in Upper Division Courses:

Upon admission to the BS program, students must attend a mandatory orientation session prior to enrollment in upper division (3000 and 4000 level) courses.

To participate in the program, students must be fingerprinted and screened by the Florida Department of Law Enforcement and the FBI prior to entering any school.

Prior to enrollment in any upper division courses, students must complete ENC 1101 - Composition I, ENC 1102 - Composition II and one general education math course.

To be eligible to enroll in EDE 4940 - Internship in Elementary Education, students must have passed all sections of the General Knowledge Test, the Professional Educator's Exam and the Subject Area Exam; and attempted the Professional Educator's Exam and the Subject Area Exam.

Cross-enrollment approval: Baccalaureate degree seeking students must obtain prior approval to cross enroll (as a transient student) in courses intended to fulfill upper division program requirements. Approval will be determined by the appropriate dean in collaboration with program faculty. Students initiate this process using www.floridashines.org/.

Upper Division Transfer Course Review: Students who have completed previous upper division coursework in an Education Program may present those courses for evaluation by the Elementary Education Department Chair. Students may transfer equivalent courses as determined by the State Common Course Numbering System. However, Florida SouthWestern State College reserves the right to

deny common course number credit for courses in which practicum or internship components reside. Florida SouthWestern State College's Office of the Registrar will ensure that previous coursework meets all relevant academic standards before acceptance for transfer. The Dean of the School of Education and the Credit Review Committee will ensure adherence to the above admissions criteria. Students must fulfill all required competencies, standards, skills and dispositions within the Bachelor of Science in Education Programs and may be required to submit additional documentation to support completion requirements. 25% of the 120 credits for the degree must be earned at FSW.

Students who have been fully admitted to the Elementary Education program, but do not enroll in at least one course for three consecutive semesters, are required to apply for readmission to the program. Upon readmission, students are governed by the catalog requirements of the readmission year. Students with special circumstances preventing them from being readmitted to the program may make an appeal to the Dean of the School of Education for their enrollment to be reactivated. Reactivation appeals must include a letter justifying the request, a letter of support from a faculty member, and any and all documentation to support the student's appeal. Reactivated students will be governed by the catalog in place during the year in which they were first admitted to the program.

In addition to adherence to the Florida SouthWestern State College Student Code of Conduct, policies, and procedures, teacher candidates must adhere to disposition policies, unit policies and procedures as published in the School of Education Handbook.

Priority Application Deadlines:

Fall term - August 1; Spring term - December 1; Summer term - April 1

Service Learning Requirement (30 hours)

All Education baccalaureate degrees have a 30-hour service learning requirement. Ten hours will be completed each semester, leading up to final internship. The requirement begins to be met with completion of EDG 4004, and the final culmination and validation of hours will be part of the final internship portfolio for each student.

General Electives (any courses numbered 1000-4999)

Students must complete a minimum of 120 credit hours to earn the B.S. degree. Typically, general electives are fulfilled with lower division coursework taken for completion of the Associate in Arts.

Total Credit Hours: 120

School Based Hour Requirements (720 total hours)

Teacher candidates must submit an application for Practicum I and II as well as for Final Internship to the Field Experience Office. All required benchmarks must be met prior to being approved for Field Experience placements. All practicum courses must span a minimum of ten weeks. During Internship, teacher candidates are expected to attend all duty days and assume all responsibilities as required of the K-12 mentor teacher.

Refer to individual course descriptions for additional information about school based hour requirements.

B.S. in Education Graduation Requirements

Students must earn a cumulative GPA of 2.5 or higher on a 4.0 scale.

Foreign Language Competency Requirement:

2 years of the same High School Foreign Language, or

Documented foreign language proficiency through testing, or

2 semesters of the same College Level Foreign Language (level II proficiency), or

Level II proficiency - this criterion occurs when a student has completed the second course of a sequence of college foreign language without completing the first course. For example, if a student has successfully completed a college-level Spanish II but not Spanish I, then the student has met the Foreign Language Competency requirement.

Students must pass all required sections of the Florida Teachers Certification Examinations (FTCE) for certification within the State of Florida.

While Florida SouthWestern State College governs a student's program requirements, changes to a program emanating from the Florida State Board of Education will take precedence over the College catalog and may alter a student's program of study.

The Florida State Board of Education requires all education students to demonstrate competency in all of the revised Florida Educator Accomplished Practices (FEAPs), Florida Subject Area Competencies (FSAC), and Professional Educator Competencies and Skills (PECS) as a condition of graduation, including completion of a professional portfolio. Elementary and Middle Grades Language Arts students must demonstrate achievement of all State required ESOL Competencies and Performance Standards and Reading competencies as a condition of graduation.

Following graduation, students must apply to the FLDOE for their teaching license.

Students must indicate their intention to attend commencement ceremony, by completing the Commencement Form by the published deadline.

Information is available online at www.fsw.edu/academics/ or on the School of Education Home Page at www.fsw.edu/soe.

Course description (provide below)	
This course provides a theoretical examination of new and emerging technologies and their impacts on politics, social lives, and culture. Students will create projects that explore emerging technologies utilizing a variety of tools, including digital photography, writing, video, or web applications. Students will track how culture has shifted due to the rapid changes in technology and will envision possible repercussions of technological use. Topic covered in the class may include social media, climate change, emerging media art, social justice, and technological isolation.	

General topic outline (type in outline below) Goals and Objectives for the course

By the end of the course students will:

- Demonstrate knowledge of technological history through writing projects.
- Analyze visual culture and the impact it has on society.
- Design speculative media works that include digital photography or web applications.
- Demonstrate teamwork in order to produce ideas for future uses of technology.
- Evaluate social issues in relation to technology and speculative solutions for those issues.
- Explain the meaning of a connected society and its impact on culture.

Section II, New Program or Certificate Information (must complete all items)

New Program Proposal

<p>List new program or certificate.</p>	<p>Digital Art and Multimedia Production AS</p>
<p>Describe (below) the process by which the need for the new program or certificate was identified. Along with the summary, delineate the parties that have endorsed the new program such as Advisory Board, Faculty, and/or Ad Hoc Committees. Submit Minutes of meetings and endorsements along with this form.</p>	
<p>The necessity for this AS degree initially came from the students’ desire to take more classes in the digital arts and multimedia production. While the certificate meets the needs of some, it does not meet the needs for all students. The subject matter of this AS is essential to many digital natives. The future of employment is changing drastically and students who want to become digital content producers must have the skills to work across many digital mediums. They must also become creative producers who can adapt to a constantly changing workforce. We want to provide a program that will give students the tools to become “digital Swiss Army knives.” The process for developing this program consisted of several meetings between the supporting faculty members: Professor Dana Roes, Dr. Ryan Wurst, and Professor Mike Molloy.</p>	
<p>Provide a summary of the Program needs analysis.</p>	
<p>The program needs were based on assessing local and national business needs. Conversations were conducted with local businesses about the needs for more digital content creators. Since this industry is also becoming less localized, conversations were conducted with digital arts consultants in cities across the US. It became clear from these conversations that it is essential to train students for the digital content creation workforce.</p>	
<p>Provide a summary of the Salary Levels that graduates of this Program can expect to make.</p>	
<p>Multimedia Artist and Animator: \$72,520 per year https://www.bls.gov/ooh/arts-and-design/multimedia-artists-and-animators.htm</p> <p>Graphic Designer: \$50,370 per year https://www.bls.gov/ooh/arts-and-design/graphic-designers.htm</p> <p>Broadcast and Sound Engineering Technicians: \$43,660 per year https://www.bls.gov/ooh/media-and-communication/broadcast-and-sound-engineering-technicians.htm</p> <p>Film and Video Editors and Camera Operators</p>

<p>Briefly describe the existing resources available needed to implement this new program.</p>
<p>Three faculty members, Dr. Ryan Wurst, Professor Steve Chase and Professor Mike Malloy, will primarily instruct classes in the classes in this program. There are also three spaces in the L building, the digital arts lab, the audio labs, and photo studio, where the classes will be taught.</p>
<p>Briefly describe the additional resources needed to implement this new program.</p>
<p>Perkins funds have been used to successfully launch the certificate programs in Digital Arts and Multimedia Production and in Music Production Technology. For the short term, the needs are minimal and within the scope of the certificate programs already in place. As the AS program grows new technology, space, and faculty will be needed to support the program.</p>

Section III, Justification for proposal

Provide justification (below) for this proposed curriculum action.

New Program Proposal

The field of digital content creation is constantly expanding and requires personnel who are ready to create, alter and produce new projects in the digital and multimedia arts. While this course is a necessity from the industry perspective, it is also one that the students at FSW are already demanding. Our student population want to become “digital Swiss Army knives.” They want the skills to create digital projects and to then make a living from those skills.

Associate of Science Digital Art and Multimedia Production

Purpose:

The Associate in Science (AS) in Digital Arts and Multimedia Production program provides a pathway to the skills and training for professional work in the expanding digital content creation industry. The sequence of courses prepares students to communicate, produce, and utilize industry standard technical training in the creation of digital and multimedia content.

Students will create, edit, and produce digital content to prepare them for further education and careers in the fields of Games and Interactivity Production, Music Production and Sound Engineering, Digital Photography, Filmmaking, Animation, and Graphic Design. As the creative digital industry is in a state of constant flux students will be introduced to avenues for adapting to and engaging with the ongoing changes in the marketplace. Students will gain experience in many areas of digital art and multimedia production and will be prepared to enter industry or create their own career pathways. This program is designed for full-time and part-time students.

Learning Outcomes:

Graduates of the program will be able to:

1. Demonstrate a technical and creative understanding of industry hardware and software related to digital art and multimedia production.
2. Create and adjust digital art and multimedia presentations in a variety of areas.
3. Design and create still imagery through digital photography and graphic creation techniques.
4. Produce creative video and animated content.
5. Utilize audio technology to aid in the creation of digital art and multimedia.
6. Utilize all aspects of computer applications from coding to software manipulation in order to create new projects.
7. Demonstrate the skills to communicate and effectively work in a team.
8. Develop mathematical skills that will inform the proper use of hardware and software in digital art and multimedia production.
9. Build a professional portfolio and demonstrate the skills needed to become employed in the industry.

Program Structure:

This program is a planned sequence of instruction consisting of 60 credit hours in the following areas: 18 credit hours of General Education Requirements and 42 credit hours of Digital Art and Multimedia Production Core Requirements (which includes 12 credit hours of primary courses and 30 credit hours of advanced courses).

Course Prerequisites:

Many courses require prerequisites. Check the description of each course in the list below to check for prerequisites, minimum grade requirements, and other restrictions related to the course. Students must complete all prerequisites for a course prior to registering for it.

Graduation:

Students must fulfill all requirements of their program major in order to be eligible for graduation. Students must indicate their intention to attend commencement ceremony, by completing the Commencement Form by the published deadline. All courses must be completed with a “C” or better.

Courses in Program:

Title Job Zone Three: Medium Preparation Needed

Education Most occupations in this zone require training in vocational schools, related on-the-job experience, or an associate's degree.

Related Experience Previous work-related skill, knowledge, or experience is required for these occupations. For example, an electrician must have completed three or four years of apprenticeship or several years of vocational training, and often must have passed a licensing exam, in order to perform the job.

Job Training Employees in these occupations usually need one or two years of training involving both on-the-job experience and informal training with experienced workers. A recognized apprenticeship program may be associated with these occupations.

Job Zone Examples These occupations usually involve using communication and organizational skills to coordinate, supervise, manage, or train others to accomplish goals. Examples include hydroelectric production managers, travel guides, electricians, agricultural technicians, barbers, court reporters, and medical assistants.

Stage Technology Certificate

Purpose

This program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for to begin working in the live entertainment industry. The program focuses on stagecraft, lighting and sound production for theatre, concerts, dance and industrial theatre.

Potential Careers:

- Lighting Technician
- Audio/Visual Technician
- Assistant Technical Director
- Set Design Assistant
- Sound Technician
- Sound Board Operator
- Lighting Board Operator
- Scenic Technician
- Master Electrician
- Scenic carpenter

Program Structure

This program is a planned sequence of instruction consisting of 17 credit hours of Stage Technology coursework.

Course Prerequisites

Many courses require prerequisites. Check the description of each course in the list below to check for prerequisites, minimum grade requirements, and other restrictions related to the course. Students must complete all prerequisites for a course prior to registering for it.

Certificate Completion/Graduation

Students must fulfill all requirements of their program major in order to be eligible for graduation. Students must indicate their intention to attend commencement ceremony, by completing the Commencement Form by the published deadline.

Dear Will,

Congrats on your China Tour, that must be a very exciting endeavor to be part of!

You recently wrote to me seeking students who are interested in experience in Technical Theatre. Interestingly, Southern Theatre Magazine is currently working on an article about a shortage of Theatre Technicians in the industry.

We (FSW) are looking at offering a 17 hour technical theatre certificate program that State of Florida created a few years ago. Part the application process asks us to document a need for such a program. This consists of asking folks in the industry to confirm a need and to write a short note or email in support of the program.

1. Would you be willing to write me a quick note indicating that you have such a need and that you support such a program? The Broadway Palm, Prather Touring, and Prather Productions, all headquartered here in Fort Myers is constantly looking to hire skilled technical theatre staff. We would also be willing to work with FSW to develop an intern program and provide for practical work experience at our venue.

2. Would you be willing to serve as an "industry advisor" to such a program? Both myself as CEO, and my national production manager, Russell Thompson would be willing to serve as industry advisors to the technical theatre program at FSW.

If yes to either of these, would you send me a quick note by tomorrow afternoon indicating your support? Great idea and let me know how I can assist!

Thanks!

Stuart

Dear Mr. Brown:

The Barbara B. Mann Performing Arts Hall would enthusiastically support the creation of a technical theatre certificate program. Among the most significant challenges the Hall and our I.A.T.S.E. Local #647 partners consistently face is a shortage of qualified technical personnel to fill our show calls.

As the number of events increases to meet the demand of the growing southwest Florida population, the need for qualified personnel will only expand. Any program that can help address that need would be most welcome.

Best Regards,

Scott Saxon

Nursing, AS

Graduates of the Associate in Science in Nursing (ASN) Program are prepared to become licensed as an entry level Registered Nurse (RN). The nursing curriculum incorporates classroom instruction, laboratory, simulation education, and clinical practice in the care of diverse populations. Local health facilities are utilized for clinical practice, including community agencies, acute care institutions, long-term and ambulatory care facilities. Graduates of the program possess knowledge, values, skills, and compassion; all are essential for professional nursing practice in a dynamic and rapidly changing health care environment.

There are two options available in the ASN program, traditional (day hours Monday-Friday on campus classes) and ANEW (Evening and Weekends, online and on campus blended format). The ANEW schedule is not a part-time Nursing program. It will require full-time commitment but it will be offered on a schedule that will consist of online classroom instruction with labs and clinical rotations offered on an evening (Monday-Friday) and weekend schedule.

Current occupational employment and wage data for Registered Nurses are published by the United States Department of Labor's Bureau of Labor Statistics at www.bls.gov/oes/current/oes291141.htm.

Accreditation:

The Florida SouthWestern State College Associate in Science in Nursing Program is accredited by the:

Accreditation Commission for Education in Nursing, Inc. (ACEN)

3343 Peachtree Road NE, Suite 850

Atlanta, Georgia 30326

Telephone: 404-975-5000

<http://acenursing.org/>

Admission Requirements:

The ASN Program consists of 72 credit hours. These hours include general education (16 credits) program specific courses (14 credits), and Nursing core courses (42 credits). Competitive applicants will have completed most or all of their general education and program specific courses before starting the Nursing core courses.

In Order to apply, Applicants must have successfully completed:

STA 2023 Statistical Methods I

BSC 1085C or BSC 1093C - Anatomy and Physiology I

BSC 1086C or BSC 1094C - Anatomy and Physiology II

Test of Essential Academic Skills (TEAS)

Nursing Core Courses, are completed in a four (4) semester cohort/group sequence. Students who begin the program in the Fall semester can successfully complete the program in 20 months. Students who begin the program in the Spring semester can successfully complete the program in 24 months.

The Traditional and ANEW schedules for the ASN Program will both require discipline and commitment. Nursing education is rigorous and must be top priority from the first semester through graduation to be successful on the NCLEX-RN licensing exam and to become a professional nurse.

LPN Florida Department of Education Gold Standard and Statewide Articulation Agreements:

This Gold Standard Career Pathways Statewide Articulation Agreement guarantees the minimum award of course credits or a block of credit toward the above AAS/AS program is ~~40-12~~ hours of credit. This agreement does not preclude the awarding of additional credits by any college through local agreements. The Licensed Practical Nurse certification, or National Licensed Practical Nurse (NCLEX-PN) certification represents industry acknowledgement of technical skill attainment of competencies in the Nursing (Associate Degree) R.N. program. To be eligible for articulation, the student must show evidence of their current Licensed Practical Nurse certification, or National Licensed Practical Nurse (NCLEX-PN) certification and **it must have been issued within three (3) years prior to their enrollment in the program.**

FSW LPN Bridge:

In accordance with the Gold Standard and Statewide Articulation Agreement for LPN's, Florida SouthWestern State College offers LPN's, meeting the agreement requirements, the option to accept an ASE1000 block of 10 credits. The ASE1000 block consists of Level I AS Degree Nursing Core Courses: NUR1020, NUR1020L, NUR1025L, and NUR2095.

Application:

The Application Deadlines are located at <https://fsw.edu/academics/programs/asnursing>

Note: Finalists will be notified within four weeks after application deadlines.

The ASN Program has limited enrollment due to the rigorous clinical education requirements for the program. Acceptance to Florida SouthWestern State College does not imply acceptance into the program. Each applicant must meet specific criteria which are listed in the admission policies. The Criteria for Admission Policies are available through the School of Health Professions Nursing office on each campus. Admission information and applications are located at: <http://www.fsw.edu/academics/programs/asnursing>.

All applicants should consult the Florida Board of Nursing website if they have any criminal offenses limiting RN licensure before applying. Refer to <http://floridasnursing.gov/licensing/licensed-practical-nurse-registered-nurse-by-examination/>

Phase I: Initial review of applications is based on a calculation of admission points using completed pre-nursing course GPA, TEAS test score, and the total number of general education/program specific courses completed. Pre-admission standardized examination includes the Test of Essential Academic Skills (TEAS).

Phase II: At the applicant's expense, a college-approved criminal records check and drug testing must be completed. Note that applicants should consult Florida Board of Nursing if they have any criminal offenses, beyond minor traffic violations, which may limit obtaining Registered Nurse (RN) licensure.

Phase III: In this phase, all applicant packets will be reviewed.

Phase IV: Selected applicants will receive a letter of acceptance. The letter will include information for accessing the Nursing Program Policy & Procedures Manual and Virtual Orientation. The student must submit an affidavit of acknowledgment, acceptance and compliance of the Nursing Program Policy & Procedure Manual by the first day of classes.

Note for LPN's: In addition to compliance of contents in Phase IV, selected LPN applicants, accepting the ASE1000 articulation pathway, must satisfactorily complete the LPN Bridge Orientation online by the first day of classes. Access to this orientation will be sent to the applicant with the letter of acceptance.

The following items must be completed before the first day of class:

Student Health Form

Immunizations

Screening for tuberculosis (TB)

Certification in American Heart Association Basic Life Support for Health-Care Providers

Proof of personal health insurance throughout enrollment in the program, naming the student and dates of coverage.

Academic Policy and Progression Criteria:

The academic standards in the Nursing program are very rigorous and require full-time commitment.

A grade of "C" or better must be earned in General Education (16 credits) and Program Specific (14 credits) courses.

The ASN Program uses the following grading system: (90 - 100 = A, 80 - 89.99 = B, 77 - 79.99 = C, 60 - 76.99 = D, Below 60 = F).

A grade of "C" or better must be earned in each Nursing/NUR course (42 credits) in order to progress in the program.

A grade less than "C" in a Nursing/NUR course will require a reattempt.

A Nursing/NUR course may be repeated or reattempted only once. If a grade of "C" or better is not achieved when the course is repeated or reattempted, dismissal from the program will result.

If a grade of "C" or better is not achieved or Withdrawal/W grade occurs in two or more Nursing/NUR courses, dismissal from the program will result.

Dismissal from the Nursing Program will occur if a student is deemed unsafe or unprofessional in clinical practice/patient care.

The Academic Review Committee (ARC) will evaluate each student who is unsuccessful in a course or has an interruption in their program sequence. An Alternate program plan will be developed by the committee in collaboration with the student

Attendance and punctuality is mandatory for all classroom, laboratory, and clinical activities. The third and each subsequent classroom absence and/or partial absence will result in a 5-point deduction from the final course grade. Attendance (100%) is required for all simulation and clinical activities.

End of Program Student Learning Outcomes:

Upon successful completion of the ASN Program, the graduate will be able to:

Advocate holistically for diverse patient populations and their families in ways that promote health, self-determination, integrity, and ongoing growth as human beings

Integrate clinical reasoning, substantiated with evidence, to provide and promote safe and compassionate quality care for patients and families in a community context.

Distinguish one's professional identity in ways that reflect integrity, responsibility, legal and ethical practices, and professional growth and development as a nurse.

Communicate respectfully and effectively with diverse populations and the interdisciplinary healthcare team through collaborative decision making to produce optimal patient outcomes.

Manage patient care effectively related to time, personnel, informatics and cost to continuously improve the quality and safety of health care systems.

Section III, Justification for proposal

Include state frameworks, accrediting or professional organization recommendations or requirements, workforce data, and/or crosswalks.

Provide justification (below) for each change on this proposed curriculum action.

1. Changes to General Education requirements:

1.1. The change consolidates General Education course into the General Education area to reflect 15 credit hours of General Education coursework in accordance with F.A.C. 6A-14.030.

1.2. The regrouping of General Education courses in the specific areas of Communications, Humanities, Fine Arts, and Communications; Social and Behavioral Sciences; and Natural Sciences and Mathematics reflects SACS area requirements. In addition, the regrouping of all General Education courses in the respective General Education areas allows for improved identification--within Associate Degree in the Accounting Technology, AS Degree Core Requirements--of the of the career and technical core courses required to earn the Associate of Science degree.

1.3. Change to ENC 1102 Composition now strongly recommends the particular writing concentration—Technical writing concentration--most valuable to students seeking a career in business.

1.4. The elimination of PHI 2600 Ethics or PHI 2103 Critical Thinking (collectively 3 credit hours) and SPC 1017 - Fundamentals of Speech Communication or SPC 2608 - Introduction to Public Speaking (collectively 3 credit hours) reduces General Education hours currently within the AS-Accounting Technology degree—while meeting F.A.C. 6A-14.030 requirements and provides students seeking an Associate of Science --Accounting Technology degree with 6 additional credit hours of opportunity to gain career and technical instruction consisting of lower division college credit courses to prepare for entry into employment.

2. Changes to Degree core requirements

2.1. General Education course previously in program core requirement is now grouped with other General Education courses so that all General Educations requirements show in one area.

2.2. The addition of MAN 2430 Ethics in Management provides students an ethics course directed at ethical situations present in a business environment.

2.3. The replacement of RMI 2001 Principles of Risk Management with RMI 2110 Personal Insurance gives students the opportunity to take the first step completing the state

requirements to become an insurance agent while still learning the principles of risk management inherent in the AS-Accounting Technology degree.

3. Changes to Degree elective requirements

3.1. Due to the number of General Education courses included within the AS Accounting Technology degree, students have been unable to have elective courses. The reduction of the General Education courses allows students with the opportunity to select a business course they may have an interest that is outside of the degree core requirements.

Accounting Technology, AS

[Return to: Programs of Study](#)

Purpose

The Associate in Science (AS) in Accounting Technology program prepares students for employment and/or promotion in occupations where a general knowledge of accounting, bookkeeping, tax preparation, and general business are required. It also prepares students for entry into a variety of baccalaureate degree programs in related disciplines such as accounting, business administration, management, and finance. The content includes but is not limited to the principles, procedures, and theories of organizing, maintaining and auditing business and financial transactions and the preparation of accompanying financial records and reports for internal and external uses.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours in the following areas: ~~18~~ 15 credit hours of General Education Requirements, ~~and~~ 42 credit hours of Accounting Technology Core Requirements, and 3 credit hours of Accounting Technology Elective Requirements. The Accounting Technology Management CCC can be earned before the student has earned the AS Accounting Technology degree.

Section III, Justification for proposal

Provide justification (below) for this proposed curriculum action.

This course will equip students to start a new venture or take over a family business by providing a step-by-step process. Students will apply the course concepts learned in ENT 2000 to their businesses. This course ENT 2000 will transfer to FGCU as a general education course in Social Science, if a student decides to obtain a bachelor's degree from FGCU.

Entrepreneurship is an essential human behavior that underpins societal progress. Individual economic activity dominates day-to-day behavior in all but a few western societies and cultures today. Most of the world's population depends on an entrepreneurial livelihood. Without an understanding of the role of the entrepreneur in economic formation and the conception of markets, a basic historical understanding of societal development is limited. Therefore, this course covers the many facets of entrepreneurship and its implications for careers, business, and society. It is designed to introduce the entrepreneurial mindset to students pursuing all College majors.

The study of entrepreneurship draws from and contributes to theories rooted in sociology, psychology, anthropology, and economics. The entrepreneurial process is, as its very core, a social phenomenon. People identify opportunities and act on them to create value **for others**. Furthermore, the creation of new organizations (a common behavior of entrepreneurs) is the creation of social structure, bringing together people to achieve a common goal. The formation of new ventures is taught in this class as an evidence-based methodology to problem identification, analysis, and decision-making. Accordingly, the assignments are designed to develop and assess critical thinking skills.

Course description (provide below)	
This is a hands-on course that focuses on the tasks that a new business owner must complete in the first 100 days of launching a business. There are a set of key activities that all businesses must accomplish to get their businesses off to a good (and legally proper) start. Some examples include securing the proper business licenses and permits, setting up a bookkeeping system, negotiating a lease, buying insurance, hiring employees, and making the first sale. A means of prioritizing and	

tracking these activities must be completed at the onset of the business. The course will also help students to better understand how to manage and work in a small family owned business. Finally, students will be exposed to behaviors and behavioral traits that will teach them how to be a more successful entrepreneur.

General topic outline (type in outline below)

- Identify the major steps in the first 100 days
- Illustrate principles of responsible risk-taking in rolling out a new venture or family-owned business
- Describe the ethical and legal framework facing family businesses & new ventures
- Explain how to protect & manage the day to day challenges of operating a business.

Section III, Justification for proposal

Include state frameworks, accrediting or professional organization recommendations or requirements, workforce data, and/or crosswalks.

Provide justification (below) for each change on this proposed curriculum action.

1. Changes to General Education requirements:

- 1.1. The change consolidates General Education course into the General Education area to reflect 15 credit hours of General Education coursework in accordance with F.A.C. 6A-14.030.
- 1.2. The regrouping of General Education courses in the specific areas of Humanities, Fine Arts, and Communications; Social and Behavioral Sciences; and Natural Sciences and Mathematics reflects SACS area requirements. In addition, the regrouping of all General Education courses in the respective General Education areas allows for improved identification--within Associate Degree in the Business Management and Administration Core Requirements--of the of the career and technical core courses required to earn the Associate of Science degree.
- 1.3. Change to ENC 1102 Composition now strongly recommends the particular writing concentration—Technical writing concentration--most valuable to students seeking a career in business.
- 1.4. The elimination of PHI 2600 Ethics or PHI 2103 Critical Thinking (collectively 3 credit hours) and SPC 1017 - Fundamentals of Speech Communication or SPC 2608 - Introduction to Public Speaking (collectively 3 credit hours) reduces General Education hours currently within the Associate Degree in the Business Management and Administration —while meeting F.A.C. 6A-14.030 requirements and provides students seeking an Associate Degree in the Business Management and Administration with the opportunity to gain additional career and technical business instruction consisting of lower division college credit courses to prepare for entry into employment.

2. Changes to Degree core requirements

- 2.1. General Education course previously in program core requirement is now grouped with other General Education courses so that all General Educations requirements show in one area.

2.2. The addition of MAN 2430 Ethics in Management provides students an ethics course directed at ethical situations present in a business environment.

3. Restructure AS-Business Administration and Management Degree program to include the AS-Business Administration Entrepreneurship specialization to the AS—Business Administration and Management Degree.

Research in support of Entrepreneurship Specialization:

- United States small businesses employed 58.9 million people, or 47.5% of the private workforce, in 2015.

(Source: U.S. Census Bureau, *Statistics of U.S. Businesses* (SUSB))

- Firms with fewer than 100 employees have the largest share of small business employment. Figure 1

provides further details on firms with employees. (Source: SUSB)

- Private-sector employment increased 1.8% during the 12-month period ending in February 2018. This was above the increase of 1.0% during the prior 12-month period. (Source: CPS)

- The number of proprietors increased in 2016 by 2.3% relative to the previous year. (Source: BEA)

- Small businesses created 1.9 million net jobs in 2015. Firms employing fewer than 20 employees experienced the largest gains, adding 1.1 million net jobs. The smallest gains were in firms employing 100 to 499 employees, which added 387,874 new jobs. (Source: SUSB)

According to the Bureau of Labor Statistics, (20%) of small businesses either fail or are no longer in business by the end of the first year. The trend worsens to (34%) by the second year, (50%) by the fifth year, and (70%) by the tenth year (BLS, 2017). Research by CB Insights polled entrepreneurs whose small business failed, which revealed that (42%) of these small businesses lacked market need for their product or service, (29%) had a lack of sufficient capital, (23%) did not have the right team, while (19%) of these small businesses fail due to superior competition (Griffith, 2014). Thereby, (61%) in total lacked a market feasibility analysis of their product or service (42%) or insight about industry competitors (19%) as the reason for failure.

Most successful entrepreneurs equip themselves with detailed knowledge about the industry and the competitive market (Rose, 2015). Further, to keep up with the latest small business trends it

is important to gain a sense of the specific market share that will impact business profits (SBA, n.d.).

The key to defining a competitive edge that creates sustainable revenue is developing a competitive analysis that helps business owners learn from businesses competing for the same potential customers (SBA, n.d.). Entrepreneurs armed with specific industry competitor knowledge and a market feasibility study were found to have a competitive edge (Rose, 2016). While entrepreneurs who were mentored received helpful example of values, attitudes, and behavior (Bosma et al., 2012).

Business Administration and Management, AS

Purpose

The Associate in Science (AS) in Business Administration and Management program prepares students for further education and for careers in entry level supervisory positions in a variety of organizations. In addition to general education coursework, the content is comprised of a broad-based business curriculum with emphasis on selected theories of management and decision making and the knowledge and understanding necessary for managing people and functions.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours in the following areas: 18 credit hours of General Education Requirements, 30 credit hours of Business Administration and Management Core Requirements, 7-9 credit hours of Specialization Track Requirements and 3-8 credit hours of approved electives.

The Business Management Specialization track consists of 7 credit hours in courses such as Accounting and Small Business Management. A degree in business administration and management can prepare you for a career in project management, team management, information management or operations management.

The Entrepreneurship Specialization track consists of 12 credit hours in courses related to entrepreneurship, small business management, and starting a business. Students will acquire a comprehensive set of skills that prepares them for working in either their own start-up or large established organizations across a variety of industries.

The Risk Management Insurance Specialization track consists of 9 credit hours in courses related to the insurance industry. Degree-seeking students who successfully complete the three insurance courses as part of their program of study will receive licenses 2-15 (Health & Life), 20-44 (Personal lines), and 4-40

(Customer Representative) exam-free after they graduate with their associate degree. Risk Management & Insurance positions include Customer Service Agent, Agent or Broker, Account Manager, Independent Agent, Claims Adjuster, Underwriter

The Small Business Management Certificate and the Business Development and Entrepreneurship Certificate are comprised of core courses in the AS Business Administration and Management degree. These certificates can be earned before the student has earned the AS Business Administration and Management degree

Course Prefix and Number	Course title (as listed in the catalog)
CGS 2260	Computer Hardware and Software Maintenance

Section V, Justification for Proposal

Provide justification (below) for this proposed curriculum action
Due to the evolution of technology, CGS 2260 Computer Hardware and Software Maintenance has been discontinued and replaced with CTS 1131 Computer Hardware and CTS 1133 Computer Software . The Catalog deletion of CGS 2260 was an oversight. CTS 1131 and CTS 1133 exist in the curriculum, and the replacements of CGS 2260 have already been made in the Catalog requirements for these programs: AS in Computer Programming and Analysis, AS in Network Systems Technology, and Information Technology Support Specialist, CCC.

CTS 1131 and CTS 1133 have already replaced CGS 2260 in the Information Technology Support Specialist CCC, Network Systems Technology AS, and Computer Programming and Analysis AS requirements, as shown below:

Information Technology Support Specialist, CCC

Purpose

A College Credit Certificate consists of a program of instruction of less than sixty (60) credits of college-level courses, is part of an AS degree program and prepares students for entry into employment.

The College Credit Certificate (CCC) Information Technology Support Specialist program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers in the Information Technology field.

The content includes but is not limited to installation of information technology equipment, troubleshooting information technology equipment, and supporting information technology users.

Program Structure

This program is a planned sequence of instruction consisting of 18 credit hours of Core Information Technology course work. Students completing this College Credit Certificate can transfer the credits directly to the Networking Services Technology and Computer Programming and/or Computer Programming and Analysis AS Degrees.

Course Prerequisites

Many courses require prerequisites. Check the description of each course in the list below to check for prerequisites, minimum grade requirements, and other restrictions related to the course. Students must complete all prerequisites for a course prior to registering for it.

Certificate Completion/Graduation

Students must fulfill all requirements of their program major in order to be eligible for graduation. Students must indicate their intention to attend commencement ceremony, by completing the Commencement Form by the published deadline.

Information Technology Support Specialist Certificate Requirements: 18 Credit Hours

[CGS 2108 - Computer Applications with Flowcharting](#) **3 credits**

[CIS 2321 - Systems Analysis and Design](#) **3 credits**

[CNT 1000 - Computer Networking Essentials](#) **3 credits**

[CTS 1131 - Computer Hardware](#) **3 credits**

[CTS 1133 - Computer Software](#) **3 credits**

Network Systems Technology, AS

Purpose

The Associate in Science (AS) in Network Systems Technology program offers a sequence of courses that present coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as cabling specialists, network control operators, data communications analysts, network technicians, computer security specialists, network specialists, network managers, network systems analysts, network systems technicians, network troubleshooters, WAN/LAN managers, or systems administrators.

The content includes but is not limited to planning, installing, configuring, monitoring, troubleshooting and managing computer networks in a LAN/WAN environment. Students will be prepared to apply conceptual and theoretical knowledge to the workplace utilizing technical skills learned during the program.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours in the following areas: 18 credit hours of General Education Requirements, 39 credit hours of Network Systems Technology Core, and 3 credit hours of General Electives. The Network Security Certificate is a 30 credit hour certificate that prepares students for entry into employment and is comprised of core courses in the AS Network Systems Technology degree. The Information Technology Support Specialist Certificate is an 18 credit hour certificate that also prepares students for entry into employment and is comprised of core courses in the AS Network Systems Technology degree. As such, either or both can be earned before the student has earned the AS Network Systems Technology degree.

Course Prerequisites

Many courses require prerequisites. Check the description of each course in the list below to check for prerequisites, minimum grade requirements, and other restrictions related to the course. Students must complete all prerequisites for a course prior to registering for it.

Computer Programming and Analysis, AS

← Return to: [Programs of Study](#)

Purpose

The Associate in Science (AS) in Computer Programming and Analysis program offers a sequence of courses that provides coherent and rigorous content aligned with challenging academic standards and relevant technical knowledge and skills needed to prepare for further education and careers such as entry level programmers, programmer specialists, computer programmers, senior programmers, chief business programmers, programmer analysts, and information systems programmers.

The content prepares individuals to analyze business situations and to design, develop and write computer programs; to store, locate, and retrieve specific documents, data, and information; analyze problems using logic/analysis tools, code into computer language; test, monitor, debug, document and maintain computer programs. More than one programming language is addressed in this degree program.

Program Structure

This program is a planned sequence of instruction consisting of 60 credit hours in the following areas: 18 credit hours of General Education Requirements and 42 credit hours Computer Programming and Analysis Core Requirements (which includes 6 credit hours of a Programming Language and 6 credit hours of Specified Electives).

The Computer Programmer Certificate is a 33 credit hour certificate and the Computer Programming Specialist Certificate is an 18 credit hour certificate; both of which prepare students for entry into employment and are comprised of core courses in the AS Computer Programming and Analysis degree. As such, they can be earned before the student has earned the AS Computer Programming and Analysis degree.

Course Prerequisites

Many courses require prerequisites. Check the description of each course in the list below to check for prerequisites, minimum grade requirements, and other restrictions related to the course. Students must complete all prerequisites for a course prior to registering for it.

Section III, Justification for proposal

Revised: 11/11, 6/12, 6/13, 7/14, 8/15, 8/16, 8/17, 5/18, 6/18; 10/18

Include state frameworks, accrediting or professional organization recommendations or requirements, workforce data, and/or crosswalks.

Provide justification (below) for each change on this proposed curriculum action.

Dependency (prerequisite) of classes are out of order. Requirements to understand the knowledge in order will help the Student succeed. Learning about Hardware and Software prior to building a network are efficient to comprehending what devices make up a network. Understanding types of Hardware and Applications with flowcharting assist the student with Principles of writing scripts in Linux and Microsoft. In the end learning two final courses simultaneously which are Computer and Network Security as well as Systems Analysis and Design will capitalize with the entire program and learning track for the Network Systems Technology, AS.
