I have moved back the course start date to 202030.

Bonnie, you should be able to create a section for the summer. Please let me know this is the case. If not, I will have to figure out a way to fix this.

Martin-FYI, the state approved this this morning to be active May 1.

Martin,
Typically, I don't make new courses for mid Catalog year. Are you authorizing me to do this to accommodate our students?

Martin, you are all set.
This is what the description is going to display if you want something different, please let me know:

This course is intended to guide undergraduate students from all disciplines through the stages of writing a proposal for their research option project and subsequent thesis. Because the course will enroll students from different disciplines, they will also become acquainted with research topics, ways of framing arguments, and making points outside their fields of study, which will help them develop a more interdisciplinary perspective.

Respectfully,

Jeffrey D. Peterman

Ok so, yes I create it in banner. Just let me know the details: Name, Credits, course description, repeatability, etc.

Respectfully,

Jeffrey D. Peterman

I tried...it is not in Banner. I have recollection of asking for BSC2910 to be created a few years back and then it was...I assumed that 'your office' created it. Something about 2910 course number being approved on mass back in the day. What is the SSACRSE (is that the screen?) history of BSC2910?

You may be right...

See if Bonnie can create it. I just saw BSC 2910 is in Banner, but not in the catalog.

I thought that the 2910 class were created on demand; that there was a blanket approval of 2910 classes. No?

Subject: RE: EVR2910

I would have to physically create it in banner. It would have to go through CC. Here is the generic xxx2910 proposal and it should be on a new course form as Undergrad Research. It can go to the march meeting, with Mary's approval and an exception for getting it onto the fall course list. Given your explanation, I don't see it being a problem.

The other alternative is to change the repeatability for BSC 2910

Jeff

Can we have a EVR2910? I tried to create a section for the summer and it doesn't exist. Or is it a bigger problem to create an EVR 2910 course.

The actual issue is students doing BSC2910 for 1 credit can only repeat 2, but the projects are ongoing. I don't suppose the 2910 classes were for up to 6 credits rather than just 2 repeats?
