SECTION III: PROPOSED COURSE CHANGES

Summary of Proposed Changes
Change the course prerequisites from COP 1822 to CGS 1100 with a grade of "C" or better.

Change the minimum passing grade to "C". |

Justification for Proposal
This course was formerly a requirement for the Computer Programming AS degree. In anticipation of the new BAS in Information Systems Technology, the department is reinstating this class as a requirement in that program, as it will prepare students for the upper-level coursework.

The current prerequisite is COP 1822 - Internet Programming with HTML. Faculty feel that CGS 1100 - Computer Applications for Business is a more appropriate prerequisite, as introductory database concepts are taught in this class. The previous prerequisite - COP 1822 has no connection to database skills. It is HTML programming. CGS1100 on the other hand, has a specific section devoted to database concepts and skills. Students are prepared to begin COP2700 after taking CGS1100. Database "programming" is different from computer programming.
Minimum passing grade of C is consistent with other Computer Science courses. |

NOTE: Complete the next section by indicating proposed course changes. **Skip fields that are not applicable** to your curriculum action.
