Subject: a plea from SCNS

CAUTION: Please Be Aware - This Email Originated Outside of FSW

Good morning:

This message is for all institutions who teach Nursing courses – please forward this email to the appropriate department heads.

The NUR prefix is almost completely out of course numbers. We are having to put proposed new courses into any open number, regardless of whether it belongs in that topic or not, which makes a real mess of the Nursing taxonomy. PLEASE, discontinue any courses you aren't actively using. Discontinue anything that has not been taught in the past five years (and discontinue it as of the last date it was taught, so as to free up the number immediately). Discontinue anything you've taught more recently but have no plans to teach in the future – again, discontinue it as of the last date it was used to free up the course number as quickly as possible.

We are desperate for available NUR course numbers! Please help us by freeing up any course numbers you are not actively using. THANK YOU!!

Julia Osmond
