New Course(s)

Course Change(s)

EVR 1001C Introduction to Environmental Science- Course Learning Outcomes

Course Discontinuation(s)**Implementation Term:** Catalog Year 2025-2026**Justification**

Apart from coinciding with a new textbook edition release, the main reason for conducting a course revision is to better align the online course with what we cover in our ground classes. Currently, online EVR students cover almost every chapter in the textbook in full - there are 18 chapters and online we cover all but 2. This is achieved by having the students complete 2 chapters and the associated assignments and labs in 1 week. We feel this is too much. Also, since we do not have the same timeframe in which to cover all of these chapters plus the labs in our ground classes, we end up either; merging related content from different chapters together, rushing over important subjects, and/or having to skip chapters altogether. This results in somewhat different content being covered in the two modalities.

To better synchronize these courses and condense the material covered, we propose to eliminate 4 CLOs - most of which have some related content that can be merged with and covered under other existing CLOs. For example; CLO 11 on atmosphere and pollution merged with CLO12 on climate change, CLO4 covered under CLO 2 (both pertaining to ecosystem functions), and CLO 8 on the importance of forest ecosystems covered under CLO 12 (climate change). We also propose to eliminate CLO 9 (basics of geology) altogether since this topic is thoroughly covered in Earth Science (ESC1000C). Eliminating/merging the above content negates the need to cover these chapters in full and have dedicated CLOs.

Eliminating the above CLOs would also allow time to separate out the important chapters in CLO13, which currently includes 4 chapters (chapters 15-18). Instead of having these all clumped together, we propose to separate this into 3 separate CLOs. Often in the ground classes, these end chapters are rushed over and/or skipped as time is running short, whereas online they are covering 2 full chapters in 1 week – this is the place of largest discrepancy between the courses.

Designation(s): General Education- Core**Course:** EVR 1001C Introduction to Environmental Science**Course Description**

This course is a survey of basic chemical, biological, and physical principles of environmental science and their applications to environmental issues. This course is appropriate for students in a wide range of disciplines or programs. Students will apply the principles of the scientific method to explain biological concepts.

<p>Topic Outline</p>	<p>Planetary Environmental Systems & Ecosystems Evolution, Biodiversity, and Ecology Human Population Trends and Projections Soil, Agriculture and Food Systems Environmental Health, Pollution and Toxicology Geology and Mining Forests and Forestry Fresh Water / Marine Science and Resource Management Atmospheric Science and Climate Change Economics and Environmental Policy Restoration, Conservation, Renewable Energy and Sustainability Strategies</p>
<p>Course Learning Outcomes</p>	<p>In accordance with Florida Statute 1007.25, this course satisfies the General Education core in Distribution Area Natural Science and meets the state outcomes for EVR 1001C.</p> <p>Student Learning Outcomes:</p> <p>Students will apply critical thinking to analysis and interpretation of environmental information and model output.</p> <p>Students will apply the scientific method to explain natural experiences and phenomena.</p>

	<p>Students will explain the basic chemical, biological, and physical principles of environmental science.</p> <p>Students will use empirical evidence to describe the historical and modern context of environmental problems and their solutions.</p> <p>All courses at Florida SouthWestern State College contribute to the General Education Program by meeting one or more of the following General Education Competencies:</p> <p>Communicate clearly in a variety of modes and media.</p> <p>Research and examine academic and non-academic information, resources, and evidence.</p> <p>Evaluate and utilize mathematical principles, technology, scientific and quantitative data.</p> <p>Analyze and create individual and collaborative works of art, literature, and performance.</p> <p>Think critically about questions to yield meaning and value. Investigate and engage in the transdisciplinary applications of research, learning, and knowledge.</p> <p>Visualize and engage the world from different historical, social, religious, and cultural approaches.</p> <p>Engage meanings of active citizenship in one's community, nation, and the world.</p> <p>A. General Education Competencies and Course Outcomes</p> <p>1. Listed here are the course outcomes/objectives assessed in this course which play an integral part in</p>

New Course(s)

Course Change(s)

HUS 1400 Alcoholism & Other Drug Abuse: Course Name, Course Learning Outcomes, Topic Outline

Course Discontinuation(s)

Implementation Term: 2025-2026 Catalog Year

Justification

Most courses in the SCNS at other institutions refer to HUS 1400 as some variation of “Introduction to...” The change to the course name brings us into line with other colleges, as well as common nomenclature in our own department. The Course Learning Objectives have been updated to better align with the course description.

Designation(s): N/A

Course: Introduction to Alcoholism and Other Drug Abuse	
Course Description	This course teaches the dynamics of drug addiction and dependence, classification and origins of drugs, short and long term effects, risk of dependence, and medical uses. Drug education, laws, treatment, and rehabilitation are additional areas of focus.
Topic Outline	<ul style="list-style-type: none"> History of drugs and alcoholism Impacts of alcoholism and other drug abuse Classification of drugs Use of drugs for medical purposes Working with multicultural and special populations Interventions and techniques used for substance abuse treatment, prevention, and intervention

<p>Course Learning Outcomes</p>	<p>All courses at Florida SouthWestern State College contribute to the General Education Program by meeting one or more of the following General Education Competencies:</p> <p>Communicate clearly in a variety of modes and media.</p> <p>Research and examine academic and non-academic information, resources, and evidence.</p> <p>Evaluate and utilize mathematical principles, technology, scientific and quantitative data.</p> <p>Analyze and create individual and collaborative works of art, literature, and performance.</p> <p>Think critically about questions to yield meaning and value.</p> <p>Investigate and engage in the transdisciplinary applications of research, learning, and knowledge.</p> <p>Visualize and engage the world from different historical, social, religious, and cultural approaches.</p> <p>Engage meanings of active citizenship in one's community, nation, and the world.</p> <p>A. General Education Competencies and Course Outcomes</p> <p>1. New Course(s)

Course Change(s)

PHI 2010 Introduction to Philosophy- Course Description; Course Designation, Writing Intensive; Prerequisite

Course Discontinuation(s)

Implementation Term: Fall 2025

Justification

The Humanities Department is requesting that the Introduction to Philosophy course (PHIL 2010) be designated as Writing Intensive within the General Education curriculum beginning AY 2025-2026.

Students in Introduction to Philosophy will enhance their critical thinking skills and demonstrate their understanding of western philosophical views in accordance with the state Student learning Outcomes for the course. This demonstration of engagement with the discipline will include written discussions offering critiques and responses to another student's viewpoint as well as research-based written individual essays or projects summarizing and analyzing concepts of the philosophical tradition such as epistemology, metaphysics, and ethics.

In PHIL 2010 courses, project topics have included the Philosophy of Religion, Metaphysics and Epistemology, and Axiology. Written responses for these topics include essays offering a critical reflection on the topic in a traditional format, a creative writing format of a letter to a philosopher, and reviews of a film, book, or other form of artistic production as it relates to the current relevance of themes in the course.

Through written responses on a number of topics on philosophical questions and figures in the history of philosophy, students will receive feedback from the instructor regarding writing styles, mechanics, and grammar as well as course-specific commentary. Instructors will explain the Student Code of Conduct regarding academic integrity, offer writing support or support services, and devote class time equivalent to one day per semester to instruction of discipline-specific writing styles and formats, including literature reviews, presentations, or bibliographies when appropriate. These written essays and discussions will total 4,000 words per student each semester.

*Please note that the red highlighted text in the course learning outcomes are the revised outcomes for all Humanities courses requested by FLDOE in November/December 2024.

Designation(s): General Education- Core Humanities; Writing Intensive

Course: PHI 2010 Introduction to Philosophy

<p>Course Description</p>	<p>In this course, students will be introduced to the nature of philosophy, philosophical thinking, major intellectual movements in the history of philosophy, including topics from the western philosophical tradition, and various problems in philosophy. Students will strengthen their intellectual skills, become more effective learners, and develop broad foundational knowledge.</p> <p>This writing-intensive course requires a minimum of 4,000 words across multiple college-level, faculty-evaluated written assignments. If completed with a "C" or better, this course will be counted toward partial fulfillment of the Writing Intensive course requirements.</p>
<p>Topic Outline</p>	<p>The nature of philosophy and philosophical inquiry; The nature of philosophy in contrast to science, religion, and politics; Major areas of philosophy historically; Philosophical questions of contemporary concern; Important figures in the history of philosophy and their views; Major philosophical movements from the history of philosophy; Questions concerning the nature of humanity and meaning Contrasting views on reality, knowledge, values, or political systems Critiques of or alternatives to traditional western philosophy</p>

Course Learning Outcomes	General Education Core Course State Standards In accordance with Florida Statute 1007.25, this course satisfies the General Education core in Distribution Area Humanities and meets the state outcomes for PHI 2010. Student Learning Outcomes: <ul style="list-style-type: none">● Students will develop critical thinking skills.
---------------------------------	---

- Students will demonstrate an understanding of classical western philosophical views.
- Students will analyze, explain, and evaluate foundational concepts of epistemology, metaphysics, and ethics.

All courses at Florida SouthWestern State College contribute to the General Education Program by meeting one or more of the following General Education Competencies:

Communicate clearly in a variety of modes and media.

Research and examine academic and non-academic information, resources, and evidence.

Evaluate and utilize mathematical principles, technology, scientific and quantitative data.

Analyze and create individual and collaborative works of art, literature, and performance.

Think critically about questions to yield meaning and value. Investigate and engage in the transdisciplinary applications of research, learning, and knowledge.

Visualize and engage the world from different historical, social, religious, and cultural approaches.

Engage meanings of active citizenship in one's community, nation, and the world.

A. General Education Competencies and Course Outcomes

1. Listed here are the course outcomes/objectives assessed in this course which play an integral part in contributing to the student's general education along with the general education competency it supports.

General Education Competency: **THINK**

	<p>Recognize major figures and movements from the history of Western philosophy.</p> <p>Analyze major movements and positions from the history of Western philosophy.</p> <p>Identify contemporary issues of philosophical concern.</p> <p>Demonstrate intellectual curiosity by evaluating new ideas over time.</p> <p>2. Listed here are the course outcomes/objectives assessed in this course which play a supplemental part in contributing to the student's general education along with the general education competency it supports.</p> <p>General Education Competency: Visualize</p> <p>Explain critiques of traditional Western philosophy.</p> <p>Interpret the experiences and emotions of others in creative and analytical work.</p> <p>Apply course concepts to real-world situations by reflecting on connections between academic ideas and personal, professional, or societal contexts.</p>
Course Assessment Statement	In this course, student learning will be evaluated through a variety of course assessments to include writing assignments, class activities, projects, quizzes, discussion, and/or participation.

New Course(s)

Course Change(s)

SPC 1017 Fundamentals of Communication Studies: Course Description, Course Learning Outcomes

Course: SPC 1017 Fundamentals of Communication Studies

Course Description	This course introduces students to the communication studies discipline. A variety of activities and class assignments are designed to acquaint students with the intrapersonal, interpersonal, and public speaking levels of communication. This course serves to demonstrate competency in both oral and written communication.
Topic Outline	Speech Communication Principles and Theories Intercultural Communication
<p style="text-align: center;">SPC 2608 Introduction to Public Speaking: Prerequisite, Course Learning Outcomes</p> <p>Course Discontinuation(s) Implementation Term: Fall 2025 Justification Due to changes at the state level, we were asked to review our courses to see if those were in alignment with new standards. In that process we reviewed our Course Learning Outcomes and Course Description to align with our purposes and the state standards.</p> <p>Removing the composition prerequisite (ENC 1101) for SPC 2608 is intended to give students flexibility by allowing them to choose either SPC 2608 or SPC 1017, which has already had the ENC 1101 prerequisite removed. By removing the prerequisite, students could take the complementary courses of SPC 2608 and ENC 1101 simultaneously. This will also allow for more flexibility in pathways and majors requiring SPC 2608.</p> <p>Designation(s): General Education- Institutional</p>	
	Interpersonal Communication Listening Computer-Mediated Communication Nonverbal Communication Public Speaking Small-Group Communication

Course Learning Outcomes	<p>All courses at Florida SouthWestern State College contribute to the General Education Program by meeting one or more of the following General Education Competencies:</p> <p>Communicate clearly in a variety of modes and media.</p> <p>Research and examine academic and non-academic information, resources, and evidence.</p> <p>Evaluate and utilize mathematical principles, technology, scientific and quantitative data.</p> <p>Analyze and create individual and collaborative works of art, literature, and performance.</p> <p>Think critically about questions to yield meaning and value. General Education Competencies and Course Outcomes</p> <p>1. Listed here are the course outcomes/objectives assessed in this course which play an integral part in contributing to the student's general education along with the general education competency it supports.</p>
---------------------------------	--

	<p>General Education Competency: Communicate</p> <p>Students will correctly identify and distinguish between intrapersonal, interpersonal, small group, intercultural, organizational/corporate, public and mediated communication contexts.</p> <p>Students will identify and explain principles of small group/team communication and leadership, recognize roles and group identities, and effectively apply the reflective thinking process to problem-solving groups.</p> <p>Students will contrast professional and personal interpersonal communication, describe conflict resolution strategies, and explain relational development, maintenance and dissolution in differing contexts.</p> <p>Students will conduct audience analyses to select an appropriate speech topic, outline and deliver speech content, and create professional presentational aids that enhance the verbal message.</p> <p>Students will apply appropriate audience-centered strategies to effectively communicate verbally and nonverbally in interpersonal, intercultural, small group and professional settings.</p> <p>Students will describe the listening process, identify listening barriers and apply strategies to enhance their listening effectiveness.</p>
--	---

	<p>Students will demonstrate effective behaviors in mediated communication contexts (i.e., social media, email, text)</p>
--	---

message, video conference) with consideration of their verbal messages, nonverbal cues, self-image and online etiquette.

2. Listed here are the course outcomes/objectives assessed in this course which play a supplemental part in contributing to the student's general education along with the general education competency it supports.

General Education Competency: **Think**

Students will identify ethical principles of communication and apply appropriate communication strategies when speaking and listening during interpersonal, intercultural, small group, presentational and mediated contexts.

Students will analyze personal communication and apply interdisciplinary theories to communicative interactions and cultural contexts.

Students will relate and apply communication concepts and theory to communicative interactions that directly relate to their field of study and career goals.

General Education Competency: **Research**

Students will locate, interpret and use information to develop meaningful presentation content, incorporating effective oral citations to credit sources, establish credibility and avoid plagiarism.

Students will distinguish credible information from noncredible information, utilizing sources widely accepted by scholars and experts.

	Students will document sources orally in presentations and use current APA Style in speech outlines, in-text citations and References pages.
Course Assessment Statement	In this course, student learning will be evaluated through a variety of course assessments including writing/speaking assignments, class activities, projects, quizzes, discussion, presentations, participation, and/or other assignments designed to meet course learning outcomes.
Prerequisites	Demonstration of readiness for college-level communication.
Corequisites	None
