Policy Updates

New Password Requirements

- Best practices from CIS (Center for Internet Security) and NIST (National Institute of Standards and Technology) recommend passwords with a minimum of 12-16 characters with **complexity rules and recommend using paraphrases**, which are longer than words but can be easier to remember. In addition, password expirations are being phased out, unless an account has been compromised.
- **The new FSW password will be required to have a minimum of 14 characters, up from 8, and the same complexity rules will apply (uppercase, lowercase, number, and special character).**
- The new requirements will go into effect with your next password expiration after 9/1/25. However, you are welcome to change your password at any time using the password reset tool in the myFSW portal.
- Currently, your password expires every 60 days. With these new requirements, there is some good news, **your password will now need to be changed every 6 months** versus the 60 days.

A workshop exploring the 4D's Framework of AI Fluency

The Institute of Innovate and Emergency Technologies is excited to host Rick Dakan, AI Coordinator and Professor of Creative Writing at Ringling College of Art and Design, for a half-day faculty workshop featuring his influential 4D's of AI Fluency framework. Developed in collaboration with Joseph Feller of University College Cork, this framework has informed multiple courses across both institutions and it underpins an open course *AI Fluency: Framework & Foundations* built with Anthropic's support, designed to teach effective, ethical, and human-centered AI collaboration.

This workshop will offer practical insights into how educators can adopt the 4D framework for teaching, curriculum design, and fostering AI fluency in students. Plan to join us to learn in depth about the 4D's of AI fluency!

More details to follow in the coming weeks. Please mark your calendars now!
